RECYCLING TIPS

You can help ensure that more materials are recycled by following these steps:

1. Empty and rinse containers. Containers with contents remaining cannot be recycled and can harm workers or damage machinery. Rinsing also helps reduce odours and pests.
2. Add materials loose to the recycling container. Only shredded paper should be contained within a bag or box.
 - *If you live in a multi-family building that has separate bins or bags for paper and containers recycling, you may place shredded paper securely inside a paper bag or box (to prevent litter) and include with your paper recycling.*
 - *If you live in a multi-family building that utilizes one bin or bag for all of your recycling, please place shredded paper inside a securely-tied, see-through, plastic bag (no opaque, coloured or black bags) and include with your paper recycling.*
3. Save space by flattening boxes and cartons. Stack containers that held the same contents, such as yogurt pots.

NEARBY DEPOTS

Find your nearest depot location at www.RecyclingInBC.ca

For information on garbage and green waste collection services, please contact your building manager or local government.

Download the MMBC app on your smartphone. Search for Multi-Material BC in Google Play or the iTunes App Store, or visit recyclinginbc.ca for more information.

ABOUT MMBC

MMBC oversees residential packaging and printed paper recycling throughout much of British Columbia, working in partnership with more than 160 collection and post-collection partners, including local governments, First Nations, non-profits and private companies.

Collection partners pick up recycling from Multi-Family buildings, at the curb and at depots, and post-collection partners accept, sort and market the materials to end markets.

The MMBC program is funded by the businesses that supply packaging and printed paper to BC residents, shifting recycling costs away from homeowners. Additional details about MMBC's residential packaging and printed paper recycling program, including a full list of accepted materials, are available at www.RecyclingInBC.ca.
